Yale Flush Sash Shootbolt Window Lock for French Casements

Yale Flush Sash Shootbolt Window Lock for French Casements

Yale have now introduced a range of extensions to enable fabricators to fit the Yale Window Shootbolt to flush French Casement windows.

The new extensions work with either the existing standard or extended gearbox to provide 'crop' or 'non-crop' solutions.

Each extension features a dual-cam bracket adjacent to the shootbolt to provide a secondary night-vent position.

Because of the dual-cam bracket the extensions are handed, so a LH and RH are required for each master leaf. Slave leaf extensions are not handed so the same extension can be used both above and below the gearbox.

See over for ordering details.

Benefits at a glance:

- Taps into the growing market for flush French Casement windows
- Corrosion resistance to EN1670:2007 Grade 4
- Tested to a minimum of 50,000 cycles operational lifespan
- Benefits from strong Yale branding
- Made in Britain

Yale Flush Sash Shootbolt Window Lock for French Casements

Order Codes

Master Leaf

Description	Size Range (mm)	VBH Code (7.7mm MB)	VBH Code (9mm MB)	Box Quantity
20BS Standard 'Crop' Gearbox	440-1420	2YSE2505	2YSE2507	40
22BS Standard 'Crop' Gearbox	440-1420	2YSE2506	2YSE2508	40
20BS Extended 'Non-Crop' Gearbox	440-1420	2YSE2501	2YSE2503	40
