New greenteQ Patio Door Handles

greenteQ Alpha Pull Handle for Inline Sliding Patio Doors

The Patio Pull handle is the latest addition to the greenteQ Alpha door handle range, sitting alongside the already well established Alpha resi-door handles.

Inline sliding patio doors can now be suited with resi-doors and windows on a whole house installation as the new handle shares the same design traits of the other members of the greenteQ Suite, including the greenteQ decorative groove. The new handle is available in the six standard greenteQ finishes of white, black, PVD gold, and polished, satin and smokey chomes.

The greenteQ Alpha Patio Pull Handle suits the popular Roto and Yale (Paddock) inline patio locks and is available with or without a PZ hole.

The handing is easily reversed, thus enabling smaller door manufacturers to reduce stocks if required.

greenteQ Alpha Patio Pull Handles are covered by the greenteQ 10 year guarantee.

Benefits at a glance:

- Part of the greenteQ Suite (6 finishes)
- Handing easily reversed to reduced stock-holding
- Fits popular Roto and Yale patio door locks
- Available with or without PZ hole
- Covered by the greenteQ 10 year guarantee
