## greenteQ Alpha Slim Lever/Lever Handle Sets

### greenteQ Alpha Slim Lever/Lever Handle Sets

The Alpha Slim Lever/Lever set is ideal for doors made from slim sash profiles, including aluminium bi-fold doors and slim section residential doors.

Such products often require a door lock with a 28 or 30mm backset. In these cases a 'normal' width backplate may clash on the outer frame when opening or closing the door, and in some instances overhang the glazing bead on the glass side.

greenteQ Alpha Slim features a slim backplate, measuring just 26mm wide x 244mm high. This compares to standard handles that are typically around 32mm, or even wider.

Although at first glance the lever looks the same as that on the standard Alpha handle set, it is in fact slightly slimmer where it attaches to the backplate, so there is no overhang.

The lever also starts its sweep almost immediately and stands off the face of the backplate by 12mm less than the standard lever. All of these details are in place to prevent handle clash in operation.

The screw pitch is identical to the standard long backplate greenteQ Alpha and Coastline door handles, as well as many other 3rd party brands. Alpha Slim is fully interchangeable with those products with no requirement for any different door prep.

Alpha Slim is available from stock in the greenteQ Suite finishes of White, Black and Anthracite Grey powder coated finishes, and satin and polished chrome.

The handle is supplied complete with spring cassettes to ensure positive operation every time.

#### Benefits at a glance:

- 26mm backplate allows fitting to slim sashes without clashing or overhang
- Swept lever stands off backplate by only 49.5mm to avoid clashing with outer frame
- Same door prep as greenteQ Alpha, Coastline and 3rd party handles
- 92PZ
- Supplied with spring cassettes
- Available in 5 colours of the greenteQ Suite
- Covered by the 10 year greenteQ guarantee
