## Anti-Panic Hardware

greenteQ

### Anti-Panic Hardware

The greenteQ Anti-Panic range is a top quality range of emergency exit and anti-panic hardware.

It is manufactured in Italy, which is well known for its expertise in this area.

The range consists of panic bolts and panic latches in cross-arm and push-pad versions, and is available from stock in white and silver finishes. Touch bars, mortice and electric devices, and other finishes, are all available on a special order basis.

Panic latches are available as either single-point or 3-point options.

Anti-Panic is available for single and double PVCu, aluminium and timber doors. The relevant striker plates are ordered separately.

An optional Outside Access Device can be purchased separately.

The Cross-Arm and Push-Pad products are tested, certified and CE marked to BS EN1125:2008 and BS EN179:2008 respectively. Copies of the certificates are available from our Technical Department or can be downloaded from the Download Area of [www.vbhgb.com](http://www.vbhgb.com).

A profile related striker list is also available to download.

All greenteQ Anti-Panic devices are reversible. Not only does this cut down on stock holding, but also eliminates costly handling errors.

See overleaf for VBH Order Codes.
