greenteQ Clearspan Intermediate Lock For System S1000 Bi-Fold Doors

greenteQ

greenteQ Clearspan Intermediate Lock For System S1000 Bi-Fold Doors

The Clearspan Intermediate lock provides secure and smooth closing of System S1000 aluminium bi-fold doors.

The 8mm diameter steel threaded rod with 24mm throw keeps would-be intruders out whilst the pre-installed tapered shootbolt ends ensure a smooth closing action for the user and provide effective weather sealing.

The robust gearbox has a 7mm square spindle with standard 43mm fixing centres. The lockcase can be deadlocked via a Euro profile cylinder for greater security. Fabricators can opt to fit either a standard intermediate Clearline handle or the profile cylinder version to take advantage of the deadlock function.

When installed, the lockcase is covered by an attractive black cover with subtle Clearspan and greenteQ Q branding.

Clearspan Intermediate lock can be ordered as individual parts or in multiples of 5 or 25. If ordering the '5' version the lock is delivered in 5 individually packed kits that include a gearbox and cover, 2 rods and 2 end guides

The greenteQ Intermediate lock is suitable for DV23, DV26, DV28 and DV29 profiles.

If ordering the '25' option the items are delivered in bulk packaging, i.e. not in individual kits.

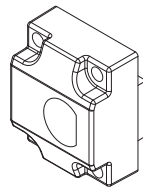

Ordering details can be found overleaf.
