greenteQ Coastline Oval Stainless Steel Pull Handles

The greenteQ Coastline range of stainless steel pull handles has been expanded with the addition of our new Oval profile designs.

The new Oval products offer an attractive alternative to the standard circular profile pulls that are already so popular.

As with all the pull handles in the Coastline range, Oval pulls are manufactured from hard wearing grade 1.4301 (or grade 304) austenitic brushed stainless steel. As such, they are covered by the greenteQ Coastline 25 Year guarantee.

The bar itself is a comfortable 45 x 26mm oval tube, mounted on 30 x 19mm legs.

There are straight and offset options. The legs of the Straight version come off the door at 90°. The Offset's bar is mounted on angled fixing brackets to offset the pull handle by 72mm from the fixing points.

Both options are available in 400, 800, 1200 and 1600mm lengths and can be fitted on their own or back to back.

Fixings are ordered separately and are suitable for composite, aluminium, timber, PVCu and glass doors. The fixings are the same as those used with the standard Coastline range.

See overleaf for VBH Order Codes.

Benefits at a glance

- Attractive Oval tube design feels comfortable and is an attractive alternative to standard circular tube pull handles
- Manufactured from grade 1.4301 (grade 304) austenitic brushed stainless steel
- 90° Straight and angled Offset versions
