greenteQ Cylinder Pulls & Circular Escutcheons

greenteQ Cylinder Pulls & Circular Escutcheons

greenteQ Cylinder Pulls and Circular Escutcheons are the perfect products for composite and wooden door manufacturers making doors with high level Euro profile cylinder positions. The circular escutcheon can also be used on doors fitted with mortice locks that require a separate lever and cylinder escutcheon.

Our Cylinder Pull shrouds the profile cylinder but provides a 20mm underhang to enable the user to pull the door closed or open. This is ideal where there is no other means to pull the door such as a pull handle or pad, and discourages misuse of the profile cylinder's key or the letterbox flap.

The Circular Escutcheon has no underhang. It is fully circular with a 52mm diameter. The external unit is chamfered to combat unlawful removal.

The internal and external parts of both the Circular Escutcheon and Cylinder Pull are sold independently. This allows door manufacturers to mix and match colours on the inside and outside of a door and also to mix between the two products if desired, as the fixing centres are common at 38mm.

The external product is attached to the door by through-fixing from the internal half. Colour matched fixings are supplied with the internal product. These fixings are concealed on the Circular Escutcheon beneath a stainless steel clip on cover.

The external products include a flange to prevent cylinder extraction.

The range is available in the standard greenteQ Suite colours of White, Black, PVD Gold and Polished Chrome, and there are also the options of Polished or Brushed Stainless Steel.

Benefits at a glance:

- Cylinder Pull prevents misuse of key or other furniture
- Mix and match colours and product on same door – no waste
- Flange prevents cylinder removal
- Attractive chamfer detail on Circular Escutcheon aids security
- Through fix from inside with colour-matched fixings
- 6 attractive finishes - part of the greenteQ Suite of colour matched door and window furniture
- Covered by the 10 year greenteQ guarantee
