## greenteQ Decorative Hinge Colours

### greenteQ Sigma Hybrid Door Hinge in Decorative Colours

To serve the growing trend towards coloured foiled or painted PVCu doors we have introduced 7 attractive new colour variants of the popular greenteQ Sigma Hybrid door hinge. The new additions take the total number of finishes available to 14.

Popular paint and foil colours include Chartwell Green\*, Cream, Silk Grey, Cement Grey, Anthracite Grey, Golden Oak, Rosewood and Irish Oak and fabricators can now choose a hinge that will either complement or contrast the door colour. Many people prefer to fit a hinge that blends with the door material as, traditionally, hinges were not seen on wooden doors but the door furniture was.

VBH Codes and details of the RAL colour finishes can be found in the tables overleaf. Note that our first stock comprises of hinges with 20.5mm frame part and +/-0.5 and +/-1.5mm sash parts. These are highlighted yellow in the table. All other sizes are available initially on a special order basis and will be subject to the factory's minimum order quantity.

Note that the coloured hinges are packaged as complete items including all items required for both the sash and the frame. Simply pick the version that matches the required upstand dimension. There may be multiple options available to choose from

#### Benefits at a glance:

- Ample 3D adjustment
- 80Kg sash weight
- 13-28mm sash upstand options
- 7 decorative colours (14 in total)
- Suits inward and outward opening doors
- Tested to BS EN 1670 Grade 5 (corrosion resistance)

# Sigma Hybrid Door Hinge in Decorative Colours
