greenteQ Window Espagnolette

greenteQ

Window Espagnolette

The greenteQ outward opening window espagnolette is ideal for those fabricators who require a simple, yet highly effective, locking mechanism without compromising on quality.

As with all greenteQ products, the espagnolette is a cost-effective solution, manufactured to a very high standard.

The espag is silver passivated to 20-25 microns, achieving 240 hours neutral salt spray test results, and has a flat 16mm faceplate with radiused ends. This means it is equally suitable for fitting into a standard full length 16mm Eurogroove or timber manufacturers can opt to rout just the length of the espag if preferred.

The inline gearbox resists a minimum 40Nm torque loading and is available in the industry-standard 20 and 22mm backsets that are required on most PVCu, aluminium and timber profiles. 7mm spindle drive, coupled with 43mm fixing screw centres mean that the espagnolette can be used with standard espag handles, including

the popular greenteQ Alpha.

Locking is achieved through 2 or 3 fully adjustable mushroom bolts that come in a choice of 7.7 or 9mm heights. These mushroom bolts locate into 2-stage striker plates to provide 'closed' or 'night vent' positions.

The espagnolette is available in 250, 400, 600, 800, 1000 and 1200mm lengths, with the 2 larger sizes incorporating 3 mushroom bolts.

Order Information

Silver finish
 Inline gearbox
 Flat 16mm with radiused ends
 240 hours neutral salt spray corrosion performance
 Minimum 40Nm gearbox torque resistance

Length	No of MB	20BS 7.7MB	22BS 7.7MB	20BS 9MB	22BS 9MB	Box Qty
