## greenteQ Omega Letterbox Range

greenteQ

### The Newly Evolved greenteQ Omega Letterbox Range

The Omega letterbox range has evolved to include both a standard sized box and a new 56mm deep Slim version to suit ultra slim transoms. Both versions feature the contemporary styling that is popular in the '20s.

Omega is an integral part of the greenteQ Suite, our range of colour and style-matched window, residential door and patio door furniture that allows a whole house installation to be tied together seamlessly.

Omega features attractive convex curved metal flaps that open to near vertical both inside and outside, ensuring that large packages can be put through the door without putting stress on the letterbox's springs. There is no groove in the flap to allow it to open fully, leaving just the attractive sheer surface. The frame ends are also metal, and are gently curved to continue the modern styling.

Omega is available in 9 finishes of the greenteQ Suite, as listed overleaf. All finishes will exceed 480 hours salt spray testing (BS EN 1670 Grade 5).

The letterbox features a strong, yet cushioned, closing action to stop rattling in windy conditions, and has an internal brush and an external foam seal to provide excellent draught and water protection.

The weather performance and endurance of Omega has been tested to the requirements of BS EN 13724. This calls for a minimum of 20,000 open/close cycles.

Omega is suitable for doors and mid-rails from 40-80mm thick and is supplied complete with fixing screws.
