New greenteQ Suite Finishes

The greenteQ Suite of window, door and patio door furniture has been expanded with the introduction of 2 new finishes.

Enduro Steel is an exciting new finish that replicates the appearance of stainless steel. It is finished with a hard wearing clear Enduro™ coating.

It looks equally impressive on contemporary styled and coloured windows and doors as it does on traditional white products.

Antique Black is a textured black finish designed to bring the feel of traditional cottage-style black ironmongery to modern windows.

It works particularly well on the new breed of heritage flush window and door products that are reaching the market now.

Please see overleaf for a list of items that are currently available in the 2 new finishes.

A comprehensive listing of all the products and their relevant colours can be found in our 'greenteQ Suite' brochure, which is available on request.
