greenteQ Alpha Door Handles in Anodised Finishes

The Alpha lever door handles are now available in F3 gold anodised and F1 satin anodised finishes.

The long backplate lever pairs will be the first products to arrive in these exciting new colours.

This brings the number of Alpha door handle finishes to 12.

The clip-on aluminium internal cover plate conceals the heads of the M6 fixing bolts for a seamless finish.

As with all Alpha handles, a flange around the inside of the cylinder cut-out eliminates any gaps if the cylinder sits slightly beneath the face of the handle backplate.

The handle is supplied with fixings to suit doors from 44 – 72mm.

Handles in the new finishes are covered by the comprehensive Q-secure consumer security guarantee, when fitted with a greenteQ Orion 3 star profile cylinder.

Benefits at a glance:

- F1 Silver Anodised and F3 Gold Anodised finishes – new to greenteQ
- Brings total number of Alpha door handle finishes to 12
