### greenteQ Aspire Sprung Door Handles & Escutcheon Plates

The greenteQ Aspire Sprung Door Handles and Escutcheon Plates are designed for use on aluminium residential and bi-fold doors.

The handle consists of a zinc base with a grade 304 stainless steel lever, finished in a choice of eight colours of the greenteQ Suite to match or complement doors in any RAL colour. The escutcheon plate is of grade 304 stainless steel construction and is finished in the same colour options, which are listed overleaf.

The handles are individually packed, complete with M5 fixing bolts. The bolts are fully concealed by a pre-assembled snap-on grade 304 stainless steel cover plate when fitted. The spindle is supplied separately and is dependant on the profile and lock used.

The strong spring ensures that the lever always returns to the 90° position.

The escutcheons require no screw fixings. Each features two concealed fixing lugs which securely hold the plate in place when knocked into pre-drilled holes on the sash profile.

The handles and escutcheons are covered by the greenteQ 10 year mechanical and corrosion guarantee.

#### Benefits at a glance:

- Sprung levers always return to 90° position
- Escutcheon plates stand off sash profile by only 4mm
- Part of the greenteQ suite
- 8 attractive greenteQ colours to match or complement any RAL colour
- Handle is supplied with fixing bolts
- Concealed fixing systems
- Grade 304 stainless steel construction
- 10 year greenteQ mechanical & surface guarantee

Ordering details can be found overleaf.
