greenteQ Coastline Stainless Steel P-Handle for Inline Sliding Patio Doors

The Coastline inline sliding door P-Handle sits alongside the already well established greenteQ Alpha P-Handle, giving customers the option to upgrade to hard wearing stainless steel handles on their inline sliding patio doors.

Both Coastline and Alpha allow inline sliding patio doors to be suited with windows, bi-fold doors, lift/slide doors and resi-doors on a whole house installation as they share the same design traits and finishes of the other components of the greenteQ Suite.

The Coastline P-Handle is available in 3 standard greenteQ finishes; Polished Stainless Steel, Brushed Stainless Steel and PVD Gold.

Its tubular grip is very comfortable in the hand when sliding even heavy sashes.

The 60mm lever makes operating the lock very easy. A longer 'DDA' lever is also available to special order. At 83mm this gives even greater leverage if required.

The greenteQ Coastline P-Handle suits the popular Roto and Yale inline patio locks and is available in sets with or without a cylinder hole and in a pull only variant (no lever or cylinder hole). There is also a stand alone blank outer plate.

The handing of the grip is easily reversed via a hex key.

The handle is supplied with M5 stainless steel fixings. These locate into threaded brass lugs on the external unit to ensure easy tightening.

Each handle set is supplied with fixings and spindles to suit 42-51mm, 52-61mm and 62-71mm profile thicknesses.

greenteQ Coastline inline sliding patio P-Handles are covered by the Coastline 25 year surface guarantee and the Q-secure 10 year homeowner security hardware guarantee.

Features and benefits

- Available in 3 finishes of the greenteQ Suite
- Hard wearing stainless steel with 25 year surface guarantee
- Smooth operation through tubular grip and longer operating lever
- Fits popular Roto and Yale patio door locks
