greenteQ Kappa Door Knockers & Viewers

greenteQ

Door Furniture

greenteQ Kappa knockers feature the 'snap-lock' fitting method that significantly cuts the assembly time. Simply attach the fixing bracket to the door face (using fasteners appropriate to the door material), then clip the knocker onto the bracket for a secure, permanent fit.

Not only is this great for the door manufacturer, but the end user benefits from not having insightly capping nuts on the internal face of the door, which carry the risk of rust staining if the threaded fixing bar is made of steel, as is often the case.

Kappa knockers are available in Classic and Slim Urn designs with or without a cut-out for the kappa 160° Door Viewer.

Kappa knockers match perfectly with all other greenteQ door and window furniture products.

Benefits at a glance:

- 'Snap-lock' fixing method
- Part of the greenteQ colour-matched suite
- Robust, yet attractive
- Classic or Slim options, with or without cut-out
- Optional Door Viewer for 35-85mm thick doors
- 20 Year greenteQ surface guarantee
