greenteQ SlimFold Handles

greenteQ SlimFold Bi-Fold Intermediate Handles

SlimFold is an attractive handle option for the intermediate locking points of aluminium bi-fold doors, working in tandem with greenteQ Clearspan intermediate locks.

SlimFold is available in three variants; internal only, internal only with profile cylinder hole, and the internal/external lever pair with cylinder hole.

The handle is available in the colours of the greenteQ Suite to perfectly match or complement aluminium bi-fold door finishes. The greenteQ Suite is a wide range of patio door, residential door and window furniture that is available in matching colours and styling. It perfectly ties in a full house installation.

When not in use, the lever nestles into the base plate to stand just 17mm off the face of the door. Not only does this provide a neat appearance when the door is closed but it allows the sashes to stack closely together when in the fully open position.

The handles feature 'Lift & Turn' technology. To open the door, simply push in the top of the lever to raise the bottom of the handle from its 'nest', and then turn the handle to unlock the door.

Fixing screws and spindles are notched to help the process of cutting to length if required.

SlimFold handles are approved for use on Q-secure installations and all colours, including plated handles, are covered by the 20 year greenteQ surface guarantee.

Main Features:

- Lockable, non-lockable and internal/external variants
- Part of the greenteQ Suite
- Stands off profile by only 17mm
- 'Lift & Turn' technology for ease of use
